New Duo-D Stripping Foam

Duo-D Stripping foam is made to speed up the stripping process allowing the diecutter to perform at its best due to the two different layers / densities.

The softer red layer compresses while the firmer grey layer holds the scrap evenly in place minimizing unnecessary and uneven nicking tears.

Each Block is 38mm high and 20mm wide. Precisely and uniformly precut, the Duo-D Stripping Foam allows the sheet to be held in more areas since less pressure is exerted on the lower board by the softer red layer.

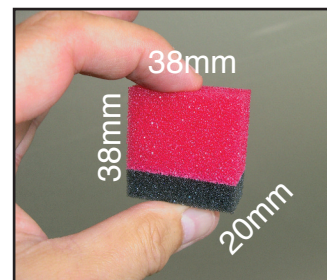

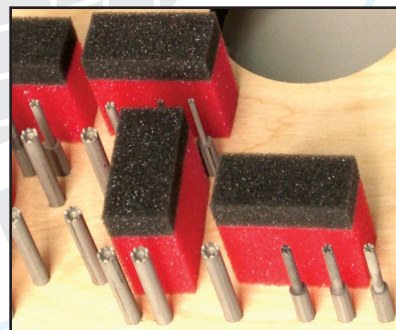

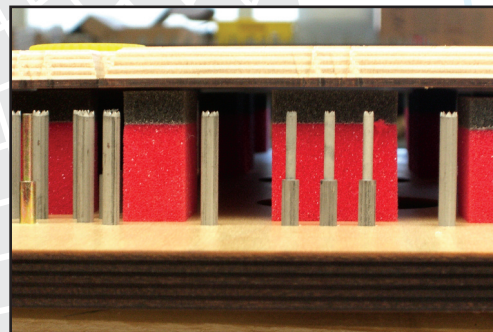

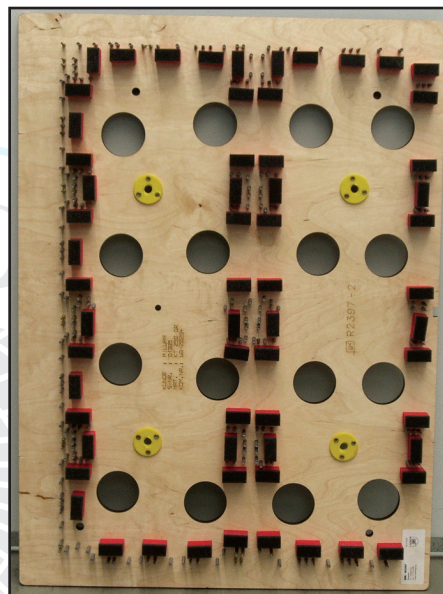

Advantages:

- Quickly adhered with hot melt adhesive or CLEAN STRIP Adhesive
- Speeds the diecutter to maximize production
- Less pressure on the female board / better stripping
- Unique colors identify the stripping board
- Faster makeready due to precut, uniformly sized pieces
- Small precut pieces allow placement in critical areas

Part Number: GRP1089103200

Foam Sheet Pressers,

3800 pcs per set - \$494.00 / \$0.13 ea
