Radius Gullet Combo.pdf

Technical Tips

Radius Gullet Combo

USE: This product was designed to reduce corrugated liner fracturing along perforation lines when attempting to crease between the cut segments.

FEATURES: This product has a rounded crease top as opposed to a sharp, square top traditionally featured with standard perf that is punch at crease height.

SPECIFICATIONS: This product is made to order from 2, 3 or 4 point center bevel cutting rule. It can be made from serrated or non serrated cut. It can also be curved for rotary (4 point only). Cut and Crease dimensions are to be specified along with a crease height desired.
